ANTIBACTERIAL TOILET SEAT

Šifra / Code: 2021

Medicinska linija - Medicinska pomoć obezbeđuje jednostavno i brzo rešenje kroz "komfornu" upotrebu WC-a za ljude sa hendikepom.

Antibakterijska zaštita - Daska za WC šolju dolazi u kontakt sa kožom i zato je veoma poželjno da daska obezbeđuje pouzdanu zaštitu od bakterija i buđi. To je upravo ono što naš asortiman antibakterijskih dasaka za WC šolje nudi. Materijal od kog se proizvode sadrži dodatke antistatika, čime se dugoročno zaustavlja razvoj bakterija.

Medical line - Medical help provides simple and fast solutions through "comfortable" use of toilets for people with handicap.

Antibacterial protection - Toilet seats get in contact with our skin and therefore the seat should provide reliable protection from bacteria and mold. And that is exactly what our anti-bacterial toilet seats offer. They are produced from anti-bacterial materials which prevents any bacterial development.
